MyKadPKI

iVEST 4MyKad Online Kit

Secure Internet Transactions and
Communications

Malaysia's leading smart
card-based PKI solution

Key Benefits:

- Your electronic ID
- Legally binding
- Full confidentiality
- Liability protection

Introduction

The Internet

The internet is an open and unsecured network that encourages easy and convenient access. Its open nature makes it a dangerous place to conduct any transactions which would require a state-of-the-art technology that a PKI-ready MyKad can provide.

What is MyKad PKI?

In addition to being your Identity Card, your MyKad also contains multiple applications for your convenience, the latest of which is Public Key Infrastructure or PKI in short.

As it is PKI-ready, your MyKad is capable to store your digital certificate, which can be used to digitally sign and encrypt Internet transactions.

Activate your MyKad PKI with iVEST 4MyKad online kit

Specially designed to be used with your MyKad, the iVEST 4MyKad online kit is an e-security solution based on PKI. It provides security functions over the internet using a combination of software, encryption technologies and essential services to ensure integrity and non-repudiation on Internet transactions.

Use iVEST 4MyKad to transact and communicate online...*SAFELY* and *SECURELY*

With this easy-to-use online kit installed in your PC, all Internet transactions and communications using your MyKad are guaranteed safe and secure. Its key features and benefits are:

Your electronic ID

iVEST 4MyKad allows easy download of a digital certificate and automatically converts your MyKad into an electronic ID for Internet usage. This will ensure all your Internet transactions and communications are always safe and secure.

Legally Binding

iVEST 4MyKad enables you to sign electronically using your digital certificate issued by a Malaysian licensed Certification Authority. This digital signature complies with the requirements of the Malaysian Digital Signature Act 1997. All communications-transactions and agreements-conducted online become legally binding.

Full confidentiality

iVEST 4MyKad ensures strict confidentiality and message integrity by deploying state-of-the-art encryption-the kind used by some of the world's top intelligence agencies and government militaries.

Liability Protection

Digicert offers a reliance limit (liability protection) for each certificate issued for the unlikely event of improper verification on the certificate subscriber. Financial losses resulting from a wrongfully issued digital certificate will be reimbursed. Please refer to the User Agreement in digicert website at www.digicert.com.my.

What do you get when you purchase an iVEST 4MyKad online kit?

- iVEST Client CD
- USB Card Reader
- Digital Certificate voucher
- User's Guide

Note: The above online kit is also available without a USB card reader.

So don't wait! Purchase your MyKad online kit now and enjoy the online convenience and security that only iVEST 4MyKad can offer. For details, visit us on the World Wide Web at www.invest.com.my or visit any of our authorised reseller outlets near you.
